LST梭鱼系列

单人小梭鱼 SY270

梭鱼系列外形整体呈流线型，吃水线比较长，是LST所有型号里速度最快的，较窄的船体可以减少水的阻力。此型号配有大号可拆卸鲨鱼鳍，提高了船身整体的稳定性和循迹性，它配了较高的座垫，坐垫的上方有足够的空间，可以避免桨手被挤在船体之间。

LST梭鱼系列

双人大梭鱼 SY330

大梭鱼外形看起来像独木舟，与冒险王相比，大梭鱼更长更窄，较长的船头和船尾使其看起来流线型更为明显。同时大梭鱼还有更大的内部存储空间和更高浮力(仅比冒险王重20%)。船尾配有可拆卸的尾鳍，大大地提高了其稳定性和循迹性。如果2人同时乘坐，建议使用单叶桨。

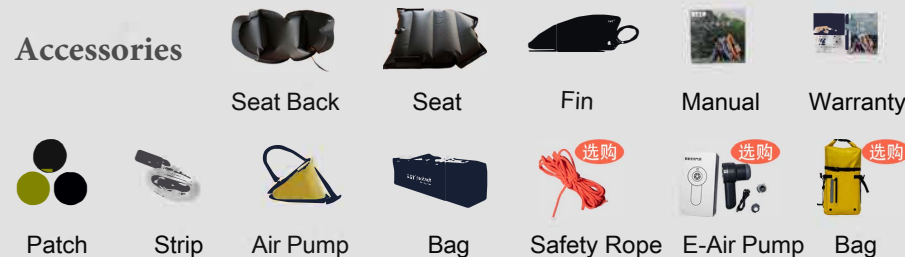

Product Weight:
5.6kgs

Suggested Load: 170kgs

TIZIP拉链的注意事项

TIZIP

The zipper used in LST's ISS (Ship Internal Storage System) is from Germany's TIZIP Company, which is lightweight, smooth, and air tight, and durable.

TIZIP, the super waterproof zipper passes test of 700 mbar atmospheric pressure.

Storage and Transpiration

During storage and transportation, it is recommended to maintain the zip closed, which would prevent the zipper from bending, damage etc.

Please avoid excessive bending during storage and using.

Please avoid storage or transportation in very humid and hot temperature environment.

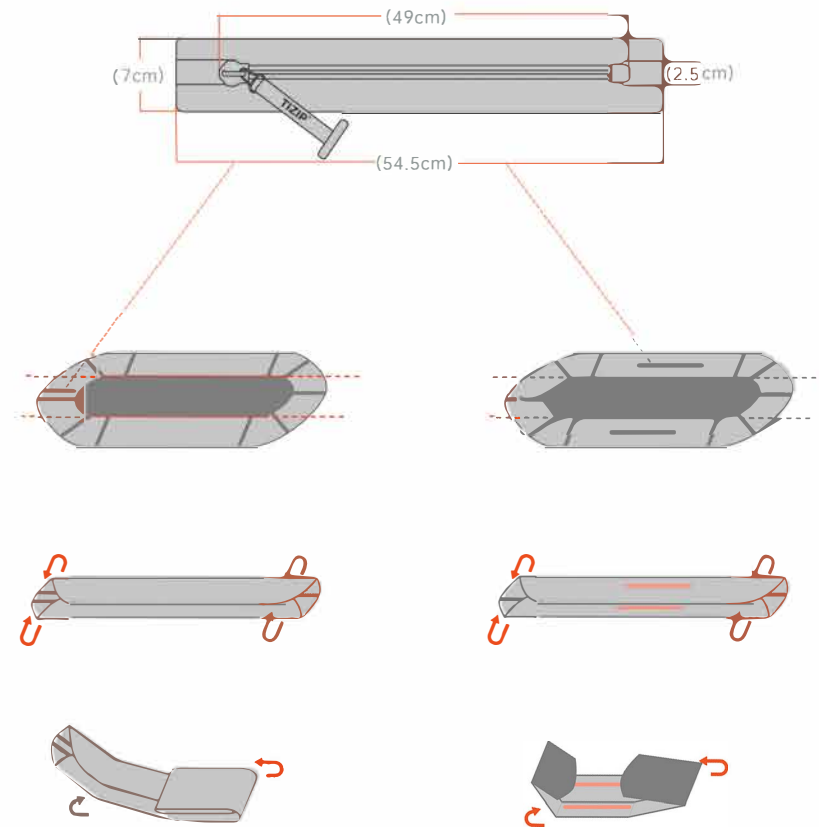

Maintenance

Proper clean is necessary. The dust and sand, stuck in the zipper, would lessen the sealing, which may cause life danger.

Before and after usage, please fully open the zipper, lubricate the zipper head, and pull the zipper head back and forth several times through.

Please check the zip and make sure it is in good performance every time before your usage!!!
