Puffer Jacket

The feathers are a soft, fluffy undercoat that sits under the stiffer feathers on the underbelly.

The most common types of down come from ducks and geese. In either case, the more mature the bird, the larger its feathers tend to be. This results in greater loft and higher fill power ratings for down.

LIGHTWEIGHT, WARM

Our down jackets strike a healthy balance between dependable warmth and lightweight simplicity for backpackers and adventurers of all kinds. While not as light as the classic ultralight synthetic jackets used by most die-hard hikers, it's got our attention for its excellent packability and insane warmth.

A down jacket is a jacket which has been insulated with the soft and warm under feathers from duck or geese. Down is a fantastic insulator as the loft (or fluffiness) of down creates thousands of tiny air pockets which trap warm air and retain heat, thus helping to keep the wearer very warm in cold winter weather.

HIGH QUALITY

Whether you're skiing down a mountain, commuting to work, or simply enjoying a winter's day in the outdoors, it's important to protect yourself from the cold. Staying warm isn't just a matter of comfort. It's a matter of safety.
