A ski suit is made from wind- and water-resistant or waterproof fabric, and has a non-removable liner made of nylon, silk, cotton or taffeta. Its main function is to keep a person warm while participating in winter sports, especially Nordic (cross-country) or Alpine (down-hill) skiing. It is generally a unisex garment. A ski suit is meant to be worn with a base layer, which consists of long johns and a warm shirt, usually designed for skiing. Ski suits are often made of Gore-Tex or similar materials.

SKI CLOTHING

SKI PANTS

XIAMEN YUELEI INDUSTRIAL CO.LTD

Ski pants go on just like a regular pair of pants, and have a zipper and button that fasten at the waist. Snow bibs are different because they extend up over the waist to the chest, and stay put with shoulder straps, like a pair of overalls. Bibs offer an added layer to the midsection and do a great job at preventing snow from getting inside your pants.
